The 2018 Tax Law Changes
ELIMINATED ALL deductions that are not stated above.

### 2022 Medical Expenses Worksheet

#### **Qualified Medical Expense List and Information**

Qualified Medical Expenses are any expense that you paid for medical care or treatment that was not paid through your employer's health plan. For example: The premium that was taken out of your paycheck to pay for your health plan cannot be used as a deduction, but a supplementary insurance policy payment that you send directly to the insurance company, or a co-pay you pay for a prescription or doctor visit can. Below is a list of the most common categories of allowable deductions. We have compiled this list to make it easier for you to organize your medical expenses.

#### STOP! - READ BELOW BEFORE COMPILING EXPENSES

The IRS <u>only</u> allows amounts from your medical expenses that are over and above 7.5% of your total Income for the current year (Your Income \* .075 = Amount Disallowed. The remainder may be used to add to your itemized deductions). See example below:

#### Example

A married couple earns 110,000 between their two jobs. Their "out of pocket" medical expenses total \$7,000 for 2022 that they had to pay out of pocket over and above the non-taxed premiums that have been paid through their employer. The IRS then multiplies their total income for the year by .075 to come up with a 'floor' figure:  $$110,000 \times .075 = \$8,250$ . This 'floor figure' is what they erase from the total 'out of pocket expenses'. In this example, the couple had \$7,000 in out of pocket expenses, but the IRS will be erasing the first \$8,250 so there will be no 'Allowed Medical Deductions' to include in their Itemized Deductions amounts.

#### Out-Of-Pocket Medical Expenses (do not include premiums taken out of your check at work)

YOU MAY SIMPLY ENTER A TOTAL AMOUNT AT THE BOTTOM. We do NOT NEED these expenses broken down. This part of the worksheet is to help YOU so that you do not miss any deductions. On the actual tax return form the IRS requires us to enter one total amount with no breakdown.

| Out of Pocket Cost for Prescription Medications                          | \$                |
|--|-------------------|
| Private Insurance Premiums such as Blue Cross NOT paid thru an employer  | \$                |
| Medicare – All Parts.  | \$                |
| Primary Taxpayer's Total Long Term Care Premiums                         | \$                |
| Spouse's Total Long Term Care Premiums.                                  | \$                |
| Fees for Doctor, Dentist and Specialty Care Visits.                      | \$                |
| Fees paid to Hospital's or Clinics                                       | \$                |
| Lab and X-Ray Fees.  | \$                |
| Long Term Care Costs over and above the Insurance Premium.               | \$                |
| Eye Glasses and Contact Lenses/Supplies.                                 | . \$              |

## **2022 Energy Credits Worksheet**

There is a lifetime limit of \$500 on energy credits. If you have taken the energy credits in the past (any time after 2005 when they became available) and have met or exceeded the \$500 lifetime maximum, you do not qualify for the credit this year or any future credits. If you have not exceeded the energy credits up to this point in time, please use our energy credit worksheet included in this package to list the items that you have installed in your home during 2021 and we will calculate the correct credit amount. **Note:** If we were not the preparer of your taxes for any of the tax years between 2005-2021, it is important to disclose how much of the credit you have taken during those years.

**Non-business Energy Credit** 

| Exterior Windows (including skylights) Purchased after June 1, 2009: U factor <0.30 SHGC <0.30  | \$               |
|---|------------------|
| Exterior doors Purchased after June 1, 2009: U factor <0.30 SHGC <0.30  | \$               |
| <u>Insulation</u> Meets International Energy Conservation Code (IECC) Standards for 2020  | \$               |
| Metal or Asphalt Roof ENERGY STAR metal roofs with "pigmented coatings" and ENERGY STAR asphalt roofs with "cooling granules  | <b>\$</b><br>".  |
| Residential Energy Efficient Property Credit  |                  |
| Gas, Propane or Oil Furnace or Water Heater Energy Factor >0.82 OR a thermal efficiency of at least 90%.  | \$               |
| <u>Central Air Conditioning (CAC)</u> The best way to find tax credit eligibility is to ask your HVAC Contractor (Heating Ventilation and Air Conditionin credit eligibility, ask your HVAC contractor to provide the Manufacturer Certification Statement for the equipment or, search the Manufacturer's website. |                  |
| <u>Biomass stoves</u> These stoves burn biomass fuel to heat a home or heat water. Biomass fuel includes agricultural crops and tree waste and residues (including wood pellets), plants (including aquatic plants), grasses, residues, and fibers.   | s, wood and wood |
| Advanced Main Air Circulating Fan  Must use no more than 2% of the furnace's total energy. Note: If the fan is qualified, but the furnace is not, you says off the cost of the entire furnace. Ask your HVAC contractor to break out the cost of the fan in your bill. You credit on the cost of the fan alone.     |                  |
| Air Source Heat Pumps   | \$               |
